

TIMBER SUPPLIER OF THE YEAR

Paragon Engineered Timber Ltd

NEATH PORT TALBOT

Paragon Engineered Timber is a Neath-based business specialising in a variety of timber services for both the domestic and commercial sectors. The timber experts design, manufacture, deliver and install a host of house building and construction solutions, including trussed rafters, engineered joists, spandrel panels and associated products. Many of their clients come from South Wales, as well as a growing level of interest in the South West of England and further afield. Blue Chip volume national house builders, such as Persimmon Homes, Bellway Homes and Crest Nicholson, use Paragon for their expertise and they also supply a number of notable regional builders, including Edenstone Homes, Wain Homes and Curo Enterprise.

The judges were particularly impressed by Paragon's passion to create something unique for their clients. Everything they undertake is inspired by a commitment to exceed their customer's expectations and through a friendly, honest and professional service, which is an ambition they rarely fall short of. Paragon have worked hard to cultivate significant relationships with other likeminded businesses and builders, who value their ethos and recognise the importance of always delivering. Through collaboration, the timber specialists consistently find solutions for clients that offer exceptional results at unbeatable prices.
